### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

1. Claims 5, 9, 11-13, 16, 19 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 is inconsistent with claim 3 because claim 3 calls for the sign extension adjustment circuitry to form –B x 2<sup>N</sup> whereas claim 5 calls for the adder circuitry to be involved in forming –B x 2<sup>N</sup>. Similarly note claim 13. The phrases "the multiple/input/two carry save adders" claim 9, lines 1-2 and "the predetermined number of least significant bits of the inverse" claim 12, lines 4-5; lack clear antecedent basis. The steps of claims 11 and 16 fail to be clearly related to the previously recited sequence of steps. The last two lines of claim 19 are misdescriptive because bit values of zero are appended to –B, not to one or more predetermined partial products.

## Allowable Subject Matter

- 2. Claims 1-4, 6-8, 10, 14, 15, 17 and 18 are allowed.
- 3. Claims 5, 9, 11-13, 16, 19 and 20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
